

# Sending PowerEPOS sales to Restoke

PowerEPOS and Restoke, over the API

**ESTIMATED TIME** 10 minutes, then Triniteq activates it

PowerEPOS used to send sales to Restoke as CSV files. It now talks to Restoke directly over their API, which sends itemised sales transactions and a full product configuration export — sales modifiers, PLU prices and product groups — rather than a summary.

## Before you start

- A Restoke account you can sign in to.
- The date you want the integration to start from.

1

## Open your Restoke settings

Sign in to Restoke and go to **Settings** → **Restoke Settings**.

### LOGIN TO RESTOKE

mbartels@triniteq.com

## 2 Copy your API key

Under **Configuration**, find your API key.

| Configuration               |                 | Edit |
|-----------------------------|-----------------|------|
| Timezone                    | Australia/Perth | ...  |
| Incoming email for invoices | [REDACTED]      |      |
| Optimal Food Cost           | 25.00%          |      |
| Optimal Beverage Food Cost  | 35.00%          |      |
| Food Cost Threshold         | 3.00%           |      |
| Sales Tax                   | 10.00%          |      |
| Accounting                  | Not connected   | ...  |
| API Key                     | Show [REDACTED] | ...  |

## 3 Ask Triniteq to switch it on

Raise a ticket with Triniteq support and include your venue name, your Restoke API key and the date you would like the integration activated from.

Triniteq confirms the activation by email. Your sales and configuration data then appear in the Restoke portal. For help using that data once it is there, Restoke's own support team is the one to ask.
